

Faculty of Business and Law is partner in the GreenProtein project, which received funding from the Bio Based Industries Joint Undertaking under the European Union's Horizon 2020 research and innovation program under Grant Agreement No 720728. The GreenProtein project aims at producing functional proteins and other food ingredients, out of vegetable residues. Dr. Dubravka Skunca, expert in life cycle assessment, is project activities leader in front of the Faculty of Business and Law.

The project started on September 2016 and it will last 4.5 years. It gathers seven partners from four different European countries: Royal Cosun (Netherlands) – coordinator, Ruitenbergh Ingredients (Netherlands), INRA (France), Bionet (Spain), Innovarum (Spain), Wageningen University & Research - WUR (Netherlands), Faculty of Business and Law (Serbia).
